

MTD2

thermostats

The MICROTEMP RANGE of electronic thermostats is specifically designed for electric underfloor heating systems. The thermostats are flush mounted and have a 2pole isolator with 16A output relay.

Standard Thermostat - MTD2

Adjustable control with air/floor sensor. Allows you to maintain a constant temperature. On/Off switch

MCD4

Programmable Thermostat - MCD4

Digital 7day / 4 event programmable thermostat. Allows you to programme on/off times and temperature, with a range of setback functions. Combines a floor and air limit sensor.

Standard colour: White

For MCD4 only

Optional colours available: Brushed chrome and charcoal
Additional cost applies.

ETN4

Home Automation Thermostat - ETN4

Home Automation compatible with setback functions. Installed in a central switchboard.

TECHNICAL DATA - MTD2/MCD4

Supply Voltage:	240Vac, 50/60hz
Output Relay:	16A SPST, 3600W max
Switching Differential:	0.4 degC
Built-in Switch:	2 pole 16A
Temperature Range:	0/+50 degC
Housing/protection:	IP20 & IP21
Dimensions (HxWxD):	115mm x 84mm x 58mm
Mounted:	Vertical or Horizontal
Sensor Length:	3m
Warranty:	2 years

FLOOR SENSOR

All Comfort Heat thermostats include a floor sensor maintaining consistent floor temperature. Floor sensing thermostats are the safest and most energy efficient ensuring the floor is not overheated, but kept at the desired temperature.
