

MWD5 programmable thermostat

The programmable **MWD5** is our most popular thermostat option, with WiFi and 7 day, 4 event, temperature and time schedules. Customize your floor heating to automatically adjust throughout the day, ensuring your floor is warm when you're at home.

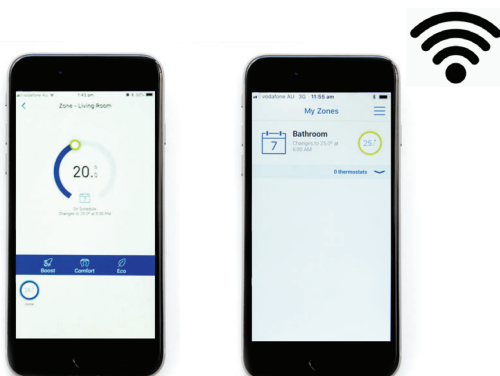

The MWD5 comes with an intuitive touch-screen interface, offering a large, color display and easy-to-use scheduling. Its adaptive control ensures both efficiency and consistent temperatures.

With the MWD5 app, you can control your floor heating from anywhere, giving you the freedom to monitor and adjust your heating zones remotely.

TECHNICAL DATA - MWD5

Supply Voltage:	240V AC, 50/60hz
Output Relay:	16A SPST, 3600W max
Switching Differential:	0.4 degC
Built-in Switch:	2 pole 16A
Temperature Range:	0/+50 degC
Clock Function:	Up to 7 different 4 or 6 event program combinations
Housing/protection:	IP21
Dimensions (HxWxD):	H 114mm x W84mm x D40mm
Mounted:	Vertical or Horizontal
Sensor Length:	3m
Warranty:	2 years

FLOOR SENSOR

All Comfort Heat thermostats come with a floor sensor, ensuring a consistent floor temperature.

Floor-sensing thermostats are the safest and most energy-efficient option, preventing overheating while maintaining your desired temperature.
